"No one ever talks about maintaining your homes HVAC systems, but it is an important investment."

"Manufacturers require proof of annual maintenance on all equipment that is installed in order to keep parts warranties in effect."

"You pay for maintenance one way or another. When your system breaks down it is more costly to fix than to maintain."

"1/10 of an inch (the thickness of a business card) of dust inside your system can lower the systems efficiency by up to 20%. Proper maintenance helps prevent that build up."
